

Shea Kristian Turner

Computer Scientist (Games Programming)

+4407538500027 – sheaturner21@gmail.com – [Portfolio](#)

Personal Profile

A proactive Computer Science undergraduate with Unreal Engine, C++, gameplay systems, modding and software experience with a diverse background in software engineering, project management and game creation, with a track record of client commissions, a digital community with over 2,000+ members and game modifications with over 200,000 total unique downloads.

Work Experience/Employment History

The Reckon Modding (Programmer) June 2022 to February 2024

- Analysed existing game systems and C++ code structures to develop and publish custom modifications with a team for over 200,000 users.
- Managed end-to-end custom client commissions, delivering projects to exact specifications.
- Built and scaled an online community to over 2,000 active members through consistent engagement.

Big Al's Gym (Gym Manager) June 2019 – January 2025

- Conducted member inductions, provided personal training assistance, and ensured strict cleanliness standards whilst also demonstrating strong leadership and organizational skills.

Airedale International (HVAC Specialist Apprentice) September 2021 - July 2022

- Constructed, terminated, and installed commercial air conditioning units under tight deadlines. While maintaining strict attention to detail to ensure full compliance with precise industry regulations.

Morrisons (Customer Assistant) April 2025 – June 2025

- Resolved customer complaints efficiently, maintaining high service standards under pressure whilst simultaneously completing work required.

Projects

An Un-tyne-ly Demise Escape Room (Project Manager Client Consultancy Project)

Led end-to-end project delivery, managing team workflows, timelines and resource allocation. I Planned project narrative and direction, coordinated cross-functional collaboration, delegated responsibilities, and structured development workflows to ensure efficient execution

FirstBlood (Unreal Engine)

Developed a playable demo horror game as a meta-game within a larger Unreal Engine Project. I constructed a 3D playable environment, interactable objects, enemies, UI and player functions such as sprinting, stamina bars, health bars and abilities.

Factor-5 (Hornet Engine – In house)

Developed a gameplay system and mechanics for a 2D arcade-style wave-based space shooter using an in-house C++ engine. This includes object handling, calculations such as friction, missile targeting and velocity, whilst also creating upgrade systems for the player and enemies.

Assembly Code Calculator

Constructed a simple calculator application in assembly code. I utilised an in-house engine called WASP that allowed me to make use of two CPU gates to allow for calculations and data handling.

Discord Bot

Made a basic Discord helper bot in Python that would aid users via keeping timetables and reminders of important events the user creates.

Education

Northumbria University - BSc (Hons) Games Computing - September 2023 – Present

- Passed Second Year: Games Computing – 74% Average.
- Passed First Year: Games Computing.
- Passed Foundation Year in Computing and Information Technology.

New College Durham - September 2019 – June 2023

- Achieved a Level 3 Diploma (8202-03) Electrical Installation at Distinction Level
- Achieved a Level 2 Diploma in Computing and IT at Distinction Level
- Achieved Level 2 Diploma in Electrical Installation in June 2020 and achieved a Pass.

Consett Academy – 2014 - 2019

5 GCSE's 4 – 9 including English and Maths, Creative Digital Media: Level 2 Merit, Music: Level 2 Merit, Health and Fitness: Distinction.

Technical Skills

Languages	C++, Python, Assembly, Luau, Lua, HTML, Bootstrap
Game Engines	Unreal Engine, Hornet Engine (In house 2D)
Tools	Visual Studio, Git, GitHub, Asset Editor, UAssetGUI
Relevant Skills	Gameplay Programming, Object-Oriented Programming, Scripting, Refactoring, Debugging, Computational Thinking, Problem Solving, Leadership, Project Management, Team Collaboration, Client Communications, Time Management, Evaluation.

Interests and Achievement

- Passionate about game development, interactive systems and online gaming communities.
- Interested in video editing, digital media production and content creation workflows.
- Entry-level experience in piano performance and digital music composition/audio arrangement.
- Awarded "Coder of the Semester" at New College Durham for programming performance.
- Set a GPC British record for a 145kg deadlift at age 14.

Additional Information

I have a full clean driving license.
